

Target IP for TI Check: **10.178.124.51** (The Attacker's IP from the live lab)

TI Validation Summary:

Cross-referencing the attacking IP (10.178.124.51) with public threat intelligence feeds (AlienVault OTX/VirusTotal) currently shows no active blocklists. The IP does not have a high reputation score. **Historical analysis indicates the source IP is dedicated to brute-forcing SMB (Port 445),** detected by our CrowdSec agent. Given the persistent, single-protocol attack pattern, priority remains **High** for containment, despite the clean external status.
